

ПІДТВЕРДЖУВАЛЬНЕ ПОВІДОМЛЕННЯ

МІНІСТЕРСТВО ЕКОНОМІЧНОГО РОЗВИТКУ І ТОРГІВЛІ УКРАЇНИ

Наказ від 28.05.2012 № 640

ISO 13571:2007

**Life-threatening components of fire —
Guidelines for the estimation of time available for escape using fire data**

прийнято як національний стандарт
методом «підтвердження» за позначенням

**ДСТУ ISO 13571:2012
(ISO 13571:2007, IDT)**

**Небезпечні для життя чинники пожежі.
Настанови щодо оцінювання часу, необхідного для евакуації,
за даними про пожежі**

З наданням чинності від 2012–08–01

**Life-threatening components of fire —
Guidelines for the estimation of time
available for escape using fire data**

*Composants dangereux du feu — Lignes directrices pour l'estimation
du temps disponible pour l'évacuation, utilisant les caractéristiques du
feu*

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 13571 was prepared by Technical Committee ISO/TC 92, *Fire safety*, Subcommittee SC 3, *Fire threat to people and environment*.

This first edition of ISO 13571 cancels and replaces ISO/TS 13571:2002 which has been technically revised.
